

FOR IMMEDIATE RELEASE

DNF Security Announces Technology Partnership with Arecont Vision

Enhanced Storage Solution Provider for Surveillance Applications Integrates into Megapixel Camera Manufacturer's MegaLab™

Hayward, CA – September 6, 2011 – [DNF Security](http://www.DNFSecurity.com), a leading provider of dependable, mission-critical IP video surveillance solutions, today announced a partnership with Arecont Vision, the industry leader in IP-based megapixel camera technology. DNF Security provided a high performance, scalable video storage appliance for the Arecont Vision MegaLab™ for integration, certification and testing of their products as well as their customers' applications. At MegaLab™, DNF Security's video storage will be integrated with a variety of leading video management systems (VMS) and Arecont Vision's complete line of IP network megapixel cameras, including 1.3 MP, 2 MP, 1080p, 3 MP, 5 MP, 8 MP, 10 MP and 20 MP resolutions.

"Working with Arecont Vision and their MegaLab™ is a great opportunity for DNF Security to showcase its systems' performance and capabilities," said Fariborz Agahdel, COO of DNF Security. "Arecont Vision's MegaLab™ is an amazing resource that allows the end user and integrators to witness and evaluate first hand a complete surveillance solution—and we are excited to be a contributor to its success."

"By partnering with Arecont Vision, DNF Security can have their customers visit our MegaLab™ to see a fully functional, fully integrated system before purchasing," stated Jason Schimpf, Director of Partner Relations, Arecont Vision. "Customers can witness live integration of any Arecont Vision camera, or combination of cameras, with the DNF Security system and their choice of VMS."

The MegaLab™ enables Arecont Vision's technology partners to test their equipment with Arecont Vision cameras. In the case of DNF Security, the facility allows for extensive testing to reach the limits of their system with Arecont Vision cameras. DNF Security can verify compatibility with a variety of VMS, in different configurations, and compare performance against its competitors.

About DNF Security

DNF Security is a leading manufacturer of dependable, mission-critical video surveillance solutions. As a subsidiary of innovative storage and server manufacturer, Dynamic Network Factory (DNF), DNF Security leverages their advanced technologies by creating video surveillance solutions designed to handle the most complex video surveillance and physical security environments. The company offers a comprehensive range of video surveillance solutions including intelligent digital or hybrid video management systems, video management engines, mobile surveillance systems, viewing workstations, and scalable IP storage. In 2008, DNF Security was recognized top industry publisher Security Sales & Integration (SSI) Magazine as the "Top 30 Technology Innovator" of the year. With a focus on providing high quality, scalable and cost-effective IP Surveillance solutions, DNF Security continues to push the boundaries in the surveillance industry. About Arecont Vision

Arecont Vision is the leading manufacturer of high-performance megapixel IP cameras and associated software. Arecont Vision products are made in the USA and feature low-cost massively parallel image processing architectures MegaVideo® and SurroundVideo® that represent a drastic departure from traditional analog and network camera designs. All-in-one products such as the MegaDome®, MegaView™ and D4F/D4S series provide installer friendly solutions. Compact JPEG and H.264 series of cameras address cost sensitive applications. These innovative technologies enable Arecont Vision to deliver multi-megapixel digital video at IP VGA camera price points. www.arecontvision.com
