**For Immediate Release**

**OMNI Data to Host Informational Seminar on  
Integrated IP Video Surveillance Solutions**

*Network Solutions Supplier Collaborates with DNF Security and Other Leading IP Surveillance Providers to Present and Discuss the Advantages of IP Surveillance Technologies*

**Woodbridge, CT. -- March 19, 2008 --** OMNI Data, a data network architect and solution provider, will host a seminar on March 26 for public safety and education professionals interested in learning more about practical applications for IP surveillance infrastructure from a panel of leading technology experts. To register for the free seminar, visit <http://www.omnianswers.net/ipvideo/default.asp>.

The seminar will held at Hyatt Place Hotel in Milford, CT., at 10 a.m. EDT, and will feature live demonstrations by OMNI Data partners and leading suppliers of IP video technologies, including DNF Security, Aruba Wireless Networks, Milestone Systems, and Panasonic. During the seminar, a real world solution will be on display, with live video footage, camera management, and the supporting network and storage infrastructure, enabling attendees to see first hand the benefits of digital video and IP surveillance.

"Because today's IP Surveillance solutions are complex, the seminar will provide end-users with an educational forum for learning more about these technologies in an informal environment," said Scott Sebastian, Director of Sales at OMNI Data. "With our expertise in integrating and supporting unified IP surveillance solutions from leading camera, software, server, and storage companies, we are looking forward to demonstrating how integrated solutions simplify management and improve communities."

**About OmniData**

OMNI Data is a Connecticut-based solution provider focused on delivering comprehensive networking solutions from design, to implementation, to ongoing support. With partnerships with key companies including Secure Computing, Fortinet, Milestone, Array Networks, DNF Security, Microsoft, Liebert and Aruba Wireless Networks, OMNI Data provides complete IT solutions and support for computer hardware, software, security and peripherals to Wide Area Networks and Internet infrastructure.

OMNIData works with a range of organizations including education institutions, municipal services, financial institutions, medium and large corporations

**About DNF Security (Dynamic Network Factory)**

Founded in 1989, Dynamic Network Factory, Inc. (DNF) is a privately held company based in the Silicon Valley (Hayward, Ca.). DNF started as a U.S. subsidiary of the publicly-traded Japanese IT conglomerate, CSK Electronics, in 1989. In 1998, the company refined its strategy and began to focus the hardware group on storage solutions. Within a year, DNF's rapid growth resulted in its emergence as an independent, privately-held spin-off. In 2006, DNF completed its acquisition of StoneFly Networks, an iSCSI storage pioneer and developer of complete, turnkey IP SAN solutions. Since its inception, DNF has designed custom solutions for organizations of all sizes and built products for many major computer manufacturers. Today, DNF consists of seven business divisions including StoneFly, DNF Security, DNF Professional Services, DNF Medical, DNF Defense, DNF Systems and DNF Storage. DNF has thousands of customers ranging from consumers and small-to-medium businesses, to government agencies, universities, hospitals, financial institutions and Fortune 500 companies.
