OnSSI and DNF Security Connect for IP Surveillance Solutions

DNF Security's Scalable, High-Performance IP Storage Now Certified with NetDVMS Software

Hayward, CA – Jan. 20, 2009 – [DNF Security](#), a [Dynamic Network Factory \(DNF\) Corp.](#) business unit and provider of mission-critical IP surveillance solutions, today announced a strategic partnership with [On-Net Surveillance Systems \(OnSSI\), Inc.](#), the market leader in non-proprietary, open architecture, intelligent IP-based video surveillance software. The agreement comes as DNF Security has completed certification of its advanced Seahawk IP storage platform with OnSSI's NetDVMS Enterprise Scale Network Video Recorder (NVR) and camera management platform.

According to Julio Montalvo, Director of Technical Services for OnSSI, DNF's scalable Seahawk IP storage platform offers robust performance for bandwidth-intensive surveillance platforms, giving OnSSI's network of system integrators, dealers and resellers a viable solution for both new and existing installations.

"DNF Security's Seahawk platform offers exceptional performance for even the most demanding applications," said Montalvo. "It represents an ideal fit for the large-scale installations that OnSSI serves."

"OnSSI and DNF share a similar philosophy in using open standards, and in supporting a range of platforms to offer our customers choices in deployment options for new and evolving environments," said Jame Ervin, product manager for DNF. "Working with an industry leader such as OnSSI allows us the opportunity to give customers an advanced, open-platform solution with integrated analytics and fully-featured camera management."

DNF Security's Seahawk product family delivers 2 to 250TB of IP storage capacity for surveillance networks. Designed to meet the needs of bandwidth-intensive and high definition video applications, it offers a scalable

easy-to-deploy platform for IP surveillance. Visit <http://www.dnfsecurity.com> for more information.

About OnSSI

On-Net Surveillance Systems Inc. offers a comprehensive IP video surveillance control and management solution. Ocularis, OnSSI's IP Video Control platform, is designed to operate on a single platform with unprecedented levels of user-intuitiveness, open architecture and scalability. With core competencies rooted in both the IT and professional security markets, OnSSI's unique solution provides feature-rich camera management, sophisticated recording and archiving, automatic Push Live Video on event, control-room video-wall management and virtual matrix functionality. OnSSI's IP solutions can be found in a wide range of municipalities, federal and local government agencies, as well as enterprise, industrial, and educational settings. For more information, visit: www.onssi.com.

About Dynamic Network Factory

Dynamic Network Factory (DNF) Corp. takes pride in its innovative spirit, engineering excellence, and broad product line. DNF's six business units focus on specific vertical markets and technologies to cover the business and government technology space. Since 1998, DNF has focused on delivering storage solutions, from direct attached storage for small business, to enterprise applications, networked storage, iSCSI and file servers in capacities from 1TB to 10PB. In 2006, DNF's acquisition of iSCSI pioneer StoneFly Networks expanded its storage portfolio to include enterprise-class iSCSI and storage virtualization technology. With the expertise of DNF Storage, DNF Systems and StoneFly, DNF Security leverages innovative storage and server technologies for mission-critical IP surveillance solutions.
