Dynamic Network Factory CEO Mo Tahmasebi to Join Panel of Enterprise Storage Experts at TechSec Solutions Conference

TechSec Offers Integrators and End-users the Opportunity to Learn About the Advantages of IP Surveillance Technologies

Hayward, CA – Feb. 16, 2009 – Mo Tahmasebi, CEO of [Dynamic Network Factory \(DNF\) Corp.](http://www.DNFSecurity.com), a cutting-edge technology company with seven enterprise storage-focused business units, has been selected to participate on an Internet Protocol (IP) storage panel with other leading experts at the 5th annual TechSec Solutions, a premier conference for integrators and end-users to learn about the latest IP surveillance technologies. The conference will be held at the Fairmont Hotel in Dallas, Texas, February 23 - 25.

TechSec Solutions will feature educational programs covering a variety of IP-related challenges and real-world applications. Tahmasebi and the other panelists will guide installers, system integrators, IT professionals, end-users and solution providers through a discussion on choosing the right storage strategies and systems.

"Today's surveillance requirements are complex. With so many challenges facing security professionals, it becomes difficult to design a robust security infrastructure," said Tahmasebi. "The IP storage expert panel will strive to educate the attendees by sharing best practices, strategies, and applications, allowing them to see first-hand the benefits of digital video and IP surveillance."

Tahmasebi will partake in the conference session entitled "*The Straight Dope on Storage*" on February 24 at 4:00 PM. The panel will explain how IP-based storage solutions are effectively used in recording and archiving video content, while also outlining the advantages of IP technologies, and providing examples of its usage.

Event Summary

- Title: TechSec Solutions
- Date: February 23-25, 2009
- Location: Fairmont Hotel, Dallas, TX

About Dynamic Network Factory

Dynamic Network Factory (DNF) Corp. takes pride in its innovative spirit, engineering excellence, and broad product line. DNF's seven business units focus on specific vertical markets and technologies to cover the business and government technology space. Since 1998, DNF has focused on delivering storage solutions, from direct attached storage for small business, to enterprise applications, networked storage, iSCSI and file servers in capacities from 1TB to 10PB. In 2006, DNF's acquisition of iSCSI pioneer StoneFly Networks expanded its storage portfolio to include enterprise-class iSCSI and storage virtualization technology. With the expertise of DNF Storage, DNF Systems and StoneFly, DNF Security leverages innovative storage and server technologies for mission-critical IP surveillance solutions.
